

Symantec™ Premium AntiSpam

Add-on subscription service provides best-of-breed spam prevention

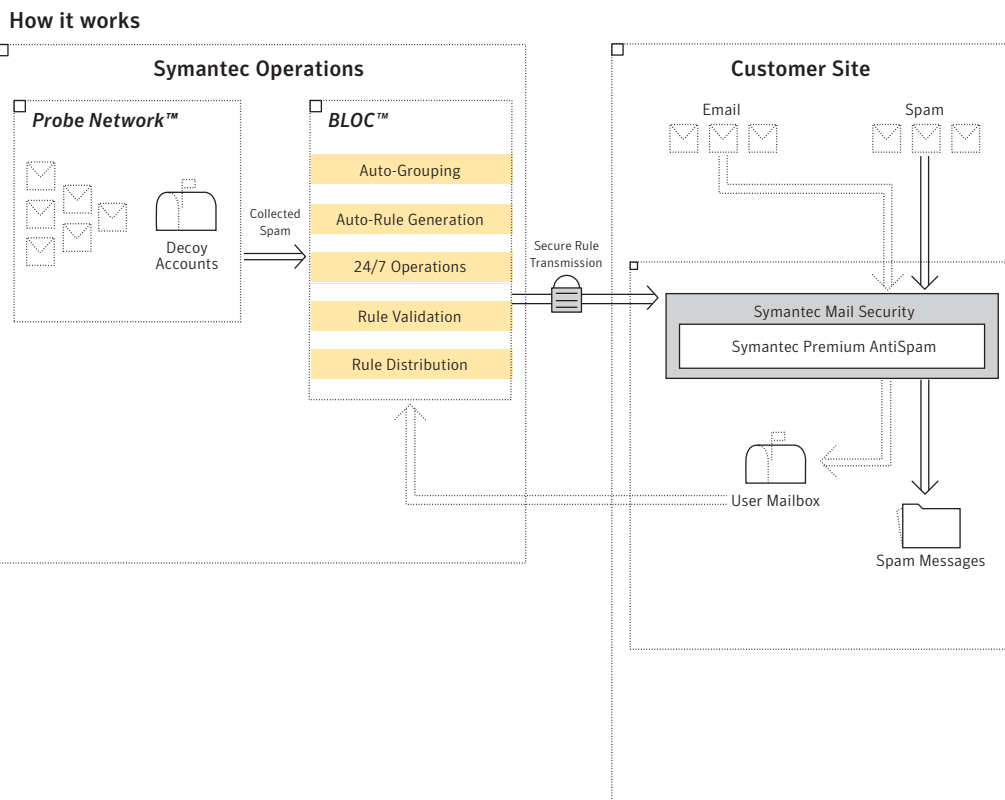

Overview

Symantec Premium AntiSpam add-on subscription service for Symantec Mail Security. Powered by Brightmail technology and response, this multi-layered spam prevention service leverages multiple filtering technologies, and offers a spam detection rate of 99% and the highest accuracy rate against false positives (99.9999%)*.

Key Benefits

- Add-on subscription service powered by Brightmail technology and response provides best-of-breed spam prevention for Symantec Mail Security and Symantec AntiVirus Enterprise Edition customers

- Multi-layered spam prevention leverages multiple filtering technologies, including spam signatures, heuristics, reputation filters, language identification, and proprietary methods
- Offers a spam detection rate of 99% and the highest accuracy rate against false positives (99.9999%)*
- No new software or hardware is required, and the service requires no additional IT administration or tuning once deployed
- Intelligent language filters detect and block foreign language spam

Features and Technical Specifications

- 99% spam-catching rate
