

Symantec™ Mail Security for Domino®

Protects against malware, spam, company policy violations, and other security risks.

Data Sheet: Messaging Security

Overview

Symantec™ Mail Security for Domino® 8.1 provides high-performance, integrated mail protection against malware, spam, and other unwanted content for Domino™ servers. With award-winning malware protection, multi-layered spam prevention features, and flexible policy enforcement, Mail Security for Domino provides comprehensive mail security with minimal administrative overhead.

Key benefits

- **Secure Scanning Optimization** – allows administrators to avoid repeated scans of previously scanned documents
- **Rapid Release Definition Support** – enables administrators to deploy antivirus definitions to the Domino environment with no additional scripting. One click returns an environment to standard LiveUpdate™ distribution methods if desired
- **Symantec Enterprise Vault™ Tags** – can be applied to specify e-mail archiving policy. Policies can be defined for any content type and set retention policy and search criteria for Symantec Enterprise Vault, Discovery Accelerator, and Compliance Accelerator
- **Graphical Reporting** – enables administrators to efficiently identify threats and monitor the overall status of Mail Security operations
- **Multimedia/Executable Analysis** – pro-actively disposes of content when defined by corporate policy
- **Attachment Content Scanning** – provides the ability to identify and/or filter inappropriate content within attachments
- **Provides Flexible, User and Group-Based Content Filtering** – to automatically identify, classify, or remove messages that violate corporate policy
- **Mass-Mailer Cleanup** – automatically eliminates entire messages infected with mass-mailer worms
- **Multilayered Spam Prevention** – combines various spam detection technologies, including a heuristics antispam engine, custom filtering rules, and whitelisting techniques to maximize detections and minimize false positives
- **Premium Antispam** – is offered as an additional content subscription
- **Zero Maintenance Mode Settings** – minimizes configuration and management time
- **Outbreak Notification** – alerts administrators to the first sign of a malware outbreak, allowing them to respond quickly
- **Optimizes Performance and Scalability** – with native 64-bit support on both Windows and AIX environments
- **Backed by Symantec Security Response** – the world's leading antivirus and Internet security research and support organization
- **Supports** – the latest versions of Domino including 7.x, 8.x and Windows® 2003/2008

New features in 8.1

- Enhanced definition capability for transparent functionality in multi-platform environments
- Support for Windows 2008, 32- and 64-bit
- Native 64-bit support on both Windows and AIX environments
- Support for Lotus Domino® 8.5.x

System requirements for 8.1

- Operating System
 - Microsoft Windows Server® 2008 R2/SP2 Standard/Enterprise (32-bit or 64-bit)
 - Microsoft Windows Server® 2003 R2/SP2 Standard/Enterprise (32-bit or 64-bit)
 - IBM AIX version 5.3, 6.1 or 7.1
 - IBM Lotus Domino Server® 7.x (32-bit) or 8.x (32-bit or 64-bit)
 - IBM Lotus Notes® Client 7.x or later
- Hardware
 - 1 GHz Intel® Pentium® Processor or higher, 512 MB Memory, CD-ROM drive
- Available disk space: 4 GB for install, 300 MB for processing

Note: For exact platforms supported, please refer to the hardware and software compatibility list. <http://www.symantec.com/business/support/index?page=content&id=TECH96823>

Note: Domino server should be sized based on Domino system requirements. System requirements should take into account additional needs such as file system antivirus protection, backup operations, and other business-critical applications unique to the environment.
